

Steve Haynes, MSc.

Chief Data Science Officer and Former President and Chief Operating Officer at North Carolina State University Poole College of Management

Steve Haynes is the former Vice-President of Global Supply Chain for Nortel Networks, Inc. and a graduate of the Master's of Science in Logistics program at Cranfield University, United Kingdom. He is the recipient of N.C. State's College of Management "best instructor" award and a key LOGTECH faculty resource. His

business career has been in the automotive, computer, and telecommunications industries with work in all areas of supply chain management including purchasing, manufacturing, logistics, and customer service.

Steve joined Nortel Networks in 1990 to lead the complete re-structuring of the logistics function for this international telecommunications firm. Success in this transformation expanded the role to embrace logistics and customer service process and organization re-design for Europe/Asia.

In 1997, Steve was promoted with Nortel Networks and moved to North America as Vice President of Global Logistics. In this position he built and managed a Logistics organization partnering with other internal and external Supply Chain Groups to establish a superior Logistics capability with global reach.

In January 2002 Steve began teaching at North Carolina State University and at the Kenan-Flagler Business School of UNC in the LOGTECH program.
