

eIDB LOG 21

Logistics in the 21st Century

A Revised Digital LOG 21

The Institute for Defense & Business (IDB) is converting many of our upcoming, in-person programs to live, online programs. This digital transformation began in April as a response to the COVID-19 outbreak in an effort to deliver as many of our programs as possible to our clients in the current restrictive environment. Designed from our successful LOG 21, a fully digital LOG 21 program has been developed to meet the demands of our clients. Now you can attend an updated LOG 21 that would have taken place in-person in Chapel Hill and even receive your Certificate via our learning management system and video conferencing platforms. This asynchronous and live collaborative learning environment promises to be very rewarding and meet the high educational standards that IDB programs have always provided.

We look forward to continuing these online offerings long into the future, even after the current crisis is behind us and in-person programs become available again.

Be Part of a Logistics Learning Network

The IDB's Logistics for the 21st Century program has been adapted for a new learning experience to form LOG 21. Broaden your knowledge of logistics and supporting fields and technologies to excel in this complex field. In this program, designed for professionals who are early in their logistics career field, you learn strategies to succeed in your role. Bring to your organization a deeper understanding of the technology and innovation that will shape the future of logistics.

With high performing individuals from all organizations within the Department of Defense and critical partners from private industry, you receive a world-class educational experience by examining and discussing complex and real-world challenges.

- Learn to maximize results for logistics operations by applying best practices and innovative thinking
- Expand your understanding of key functional areas that support logistics
- Grow your professional network to include logistics professionals across many organizations.

REGISTER TODAY

LOG 21

Logistics in the 21st Century

Digital Program Format

The IDB understands the complexities of your personal and professional environments and uses the latest online capabilities and techniques to deliver world-class content. Engaging on an interactive digital platform, you will interact in your class both on your own time as well as with your classmates through a suite of video conferencing and online tools.

LOG 21 utilizes collaborative digital tools, comprehensive content segments, and different learning formats to effectively capitalize on the new online environment and learning styles. Self-paced content and discussions provide background knowledge to prepare you for the analysis, integration, and application to enhance in-person faculty sessions. In the “live” sessions, you’ll engage directly with our talented faculty and guest speakers who guide you through current teachings, research, case studies, and simulations.

You develop actionable takeaways, facilitating your professional growth and immediate return on investment to your organization. Virtual discussions and project groups connect you to a new professional network of peers and upon graduation, you are connected with a larger community of over 8,000 alumni and thought leaders.

Individuals and teams are encouraged to attend. Team participation within an organization is encouraged to amplify the program’s impact on your organization.

SEVERAL KEY TOPICS COVERED INCLUDE:

- Design thinking and the Power of Simple Rules
- Logistics, Risk, and the Organization
- Wireless Communications: Harnessing the Value of Mobile Data
- Technology, Innovation, and the Logistics Enterprise
