****:** Specialized programs made for and offered to individual organizations/groups. If you would like to inquire into a specialized program for your organization, please contact solutions@idb.org

"Life cycle management is a team sport. You need leaders in the civilian, uniformed military, and contractor communities to integrate efforts. The only place I'm aware of where these communities come together is at the IDB."

LCELP Alumnus

"IDB Programs provide an environment that enables military, industry, and academia to work collaboratively to craft improved defense solutions based on state of the art processes and technology."

LOGTECH Executive Private Industry Alumnus

"I normally leave a course trying to recapture what I was taught and search for ways that I could implement things into my workspace. After this course, I was almost overwhelmed with different techniques that I could use, not only in my workspace, but in my personal life as well. I have found the LOG21 program to be a leadership program, to help open my mind and tap into different strategies to solve the most common or difficult roadblocks. I can't thank you enough for the opportunity."

Log 21 Alumnus
