

LCELP

Life Cycle Executive Leadership Program

THE FUTURE IS NOW

The IDB's LCELP Program is a dynamic one-week program designed to provide participants with new tools and insights for **Optimizing Life Cycle Management Cradle to Grave**. LCELP equips life cycle leaders with strategies to reduce costs and increase effectiveness across product and systems design, improvement, and sustainment. Participants collaborate with peers from diverse organizations across the public and private sector to exchange best practices. Expert faculty and industry practitioners lead participants to develop a deeper understanding of life cycle theories, practices, and techniques to cultivate an integrated, effective, and efficient life cycle of products and services.

ABOUT THE IDB

Programs offered by the IDB target leaders at all levels and multiple functional areas. They are designed to provide knowledge, skills, and tools to better equip leaders to implement impactful change. Some areas of study include strategy, innovation, risk management, contested logistics, data fluency, AI and critical thinking. Our programs educate, energize, and provide leaders with the intellectual capital critical to successful transformation.

GRADUATE OUTCOMES

- **Strategic Planning and Critical Thinking**
- **Leading Edge Industry Best Practices**
- **Next Generation Systems Thinking**
- **Leading Innovation**
- **Global Life Cycle Sustainment Awareness**
- **Data Fluency, AI, and How to Use It**
- **Expansion of Professional Network**
- **Professional Education Certificate**
 - 40 Continuous Learning Points from the Defense Acquisition University and approximately 4.0 Continuing Education Units from UNC General Administration

SMALL GROUP PROJECTS

Prior to the program, each participant submits a problem statement outlining a life cycle management challenge that they face in their job. These statements are distilled into five to seven common topics, which are assigned to working groups comprised of participants with similar challenges. The groups meet during the week to explore solutions, exchange ideas, and apply lessons learned from the day's sessions. On the final day participants brief a professor and a senior military and/or private sector leader on their proposed solutions.

TESTIMONIAL

"Life cycle management is a team sport. You need leaders in the civilian, uniformed military, and contractor communities to integrate efforts. The only place I'm aware of where these communities come together is at the IDB."
